

## Save a Child Website Design and Development

Save a Child is the vital link between people who want to help deprived children and the children who need that help. This very good cause is also received AVdrive Goodworks project status. We consulted and made a design that incorporated a old logo and supported with a new complementary design elements into a vibrant image and personal image. It is a content managed website with great capacity to deliver Save a Child many benefits with the ability for them to update both text and menus with compelling stories about their field work with the children and their fund raising events.

Founder Louise Nicholson Save a Child, " Thank you most warmly from all at Save a Child for creating what I believe is a very appropriate website for Save a Child. You have been sensitive to what we do and the way we do it, setting out our strengths clearly...Again, many thanks for your big contribution. Save a Child now has its essential tool."
